MINIES MININGSTOCKS

ORE EXTENDS INTO TWO MINES

Strike Affects Both the Little Bell and the West Quincy.

FORMER TO RESUME WORK

RICH ROCK FOUND AT DEPTH OF foll 1,100 FEET.

An important development, which means much to the properties in which it has occurred and to a number of neighboring properties in the same camp, is that in the Little Bell and the West Quincy, at Park City, encountered within the past week. The first account of the strike was verified yesterday by Manager G. D. B. Turner, who had just returned from camp and who has been almost entirely respon-

who has been almost entirely responsible for the work in that property since the organization of the company less than two years ago. Mr. Turner was reticent about giving out data, and did so only because of reports afloat that might not be accurate.

The find was made by means of a tunnel that enters the West Quincy holdings through the Little Bell grounds and is 1,100 feet deep, with nothing but virgin ground between that point and the surface. The ore body contains silver-lead ores and is from two to three feet in thickness, and is in rather irregular form.

From samples taken from this body the lowest assays have shown 3 per cent lead.

lowest assays have shown 3 per cent lead, seventy ounces of silver and \$2 in gold to the ton, with some copper. The highest assays have yielded 20 per cent lead, 160 ounces of silver, \$2 in gold and 3 per cent copper.

Found First in Little Bell.

Dec. 1 last the tunnel was started from Little Bell ground toward the West Quincy shaft, with a prospective length of 2,870 feet. Since that time the work has progressed without interruption with three shifts a day, and an average of practically 300 feet has been made a month. The equipment

been made a month. The equipment included five drills, with a ten-inch pipe along the top of the tunnel for the purpose of ventilation.

The ore body is found in a contact vein between lime and Ontario quartzite. This vein was encountered first in the Little Bell ground, where a crosscut was extended through it into the lime. The work was then turned to recut the vein. The face of the crosscut is now in the hanging way and shows the body of ore.

Hopeful for Future.

A cross-cut is now being run to the quartzite foot wall, and from indications of the ore already found, and from conditions prevailing in the camp, it is believed that a larger body of silver-lead ore will be found. The conditions of development in this property have been identical with those found in the West Quincy's greatest neighbors, the Silver King, Daly-West and the Daly-Judge. It is stated that the West Quincy and Little Bell are placed on an equal footing and under similar conditions by the development made by this tunnel. This locality is known as "Bonanza Flat," and its development will give an impetus to neighboring properties and will be an encouragement to the entire camp. While the work has been aggressive and short-lived in the West Quincy, the theory on which it was performed was the result of several years' observation of the ground by Mr. Turner before he decided to take up this particular work. Almost alone he has financed the concern and planned and executed the work in accordance with the theory that is now being demonstrated.

Selling value, 82,611.82.
Value of shares sold during week, 12 Value of shares sold during w cross-cut is now being run to the executed the work in accordance with Iron Silver the theory that is now being demon- Lead. Con.

lager Solon Spiro of the Little Bell returned from the camp last evening and announced that as a result of the strike, work would be resumed in the Little Bell early this week. New-ton Dunyon, formerly of the Daly-Judge and other properties, will be in

"Our surveyors have found that the main strike is in the Little Bell," said Mr. Spiro, "and we shall go to work to open up the ore body. I see no reason why the ore should not be found in quantities in the West Quincy also, and I hope it is, as there ought to be plenty for all."

BIG TUNNEL ON BOULDER.

Will Be 5,000 Feet Long and Cut 2,800 Feet Deep.

2,800 Feet Deep.

The Boise concern that, under the corporate name of the Boulder Consolidated Mining company, has been operating on Boulder Creek, about twenty-five miles north of Halley, has begun the execution on a project that will prove of immense importance, says the Woodriver Times. It is going to drive a tunnel from the Woodriver side of the Boulder range to the east fork of the Salmon.

This tunnel will be over 5,000 feet in leng's and cut the formation at a depth of 2,500 feet under the agex of the mountains. It will prospect, drain and develop a large extent of mineral-bearing ground. The company itself owns twenty-four claims on this side of the range, but there is room for over 90 adidtional claims on this side and as many more on the Salmon side.

The ground is known to carry much high

mon side.

The ground is known to carry much high grade mineral, as much float has been found there from the first settlement of this region. Several of the locations, like the Homestake, the Ophir, the Boulder, and others, have yielded many carloads of chipping ore.

and others, have yielded many carloads of shipping ore.

The Boulder Consolidated Mining company includes John Lemp, the Falk estate, and Colonel Woods of Boise, whose combined wealth exceeds a million dollars, it is therefore abundantly able to carry on the enterprise. It has given orders to begin the actual driving work of the tunnel by the 15th of next month. In the meantime the company will continue work upon its claims at Boulder, and will not discontinue this even when driving the tunnel. For instance, it will keep nine men at work upon the Kid mine, that the sons of William Shultz, their superintendent and co-owner, discovered while at play there, two years ago.

SMELTING BY ELECTRICITY

Canada.

Vice Consul General Gorman of Montreal reports that the Dominion government has appropriated \$15,000 for making experiments with the electric process of smelting ores and manufacturing steel at Sault Ste. Marie, and the Consolidated Lake Superior Power company will furnish a building and dynamo capable of supplying 400 electric horse-power for four months free of charge. All kinds of ores will be experimented with, and important results are expected to be obtained, says the Denver Mining Reporter.

Great possibilities for Canada underlie the inauguration of a cheaper process for manufacturing pig iron and steel than is now in use. Ontario is dotted with ore bodies, the development of which is at present prevented by lack of cheap fuel. There is coal in the eastern and western parts of Canada, but the cost of conveying it to points where coke is needed for smelting purposes is prohibitive. On the other hand there are a great many water powers throughout the provinces of Ontario and Quebec, where electricity can be developed and utilized. If the electric

of a large amount of capital and considerable mining development.

MINING STOCK EXCHANGE.

Weew Closes With Quiet Day-Lower

Mammoth Leading Seller.

The week on the mining exchange closed with the sale of 135,591 shares of stock, for which \$33,210.01 was paid. The sales of the day included 24,200 shares of stock with a selling value of \$3,611.62. Yesterday Lower Mammoth was a leading factor on the exchange and of its stock over 5,000 shares sold between 30c and 31c. New York was active and improved prices ruled, the sales aggregating 1,200 shares on an increasing scale from 45% to 48 ca share. May Day found buyers for 6,000 shares at from 9½c to 9% per share. TINTIC MINING NOTES.

Experiment Is Now Being Tried in Developments of the Week in This District.

(Eureka Reporter.)

Assessment No. 32 of 3 gents per share on Snowflake stock will be delinquent on the 21st inst.; day of sale. Sept. 6.

The Victoria Gold Mining company, owning the Annie Laurie group in North Tintic. has levied an assessment of 1/4c per share. The assessment will be delinquent on Sept. 15; date of sale. Oct. 2.

The machinery at the Martha Washington mine will most likely be moved to the Copper Jack property in the Erickson district.

Louis Gatewood has a splendid body (Eureka Reporter.)

road to the mine will result in quite a saving in the handling of the Eagle & Blue Bell output.

The Raymond-Illinois property has been started up again with one shift. Drifting on the 1,500-foot level was commenced during the early part of the week. The development of this property will be watched closely by the mining men of Tintic, as the tapping of the northern extension of the big ore zone of this district will mean much for the North Tintic section.

Local shareholders of the Grand Central and Victoria mining companies received their dividend checks last Tuesday night. The dividend from the Grand Central amounted to 5c per share, or \$12,500, while the Victoria, the baby bononza of Tintic, passed around \$10,000. The Victoria's treasury is reported to be in splendid condition and there are reasons, to believe that other dividend will follow. The Victoria promises to duplicate if not excel the record of its older sister, the Grand Centra?

William R. McComb informs the Reporter that he has encountered a nice body of silver-lead ore in the old Mike Gomery property to the northeast of Homansville. Mr. McCombs relocated the ground about eighteen months ago and uncovered this ore while doing the assessment work. There is a ninety-foot tunnel on the property and it was in the face of this that the ore was found. An assay which was received yesterday shows values of 30 ounces silver. 8 per cent lead and \$1.00 in gold. Mr. McComb was one of the fortunate ones in the Uintah land drawing and will allow the mining property to remain idle until his return from the reservation.

DEPART FOR CANADA.

Utah Mining Men to Attend Meeting in Northwest.

Samuel Newhouse left yesterday for Greenwood, B. C., where in a few days will be held a meeting of the directors of the Montreal & Boston company, the properties of which are located near that place. Among those from the east who will be at the meeting are former. Senator Warmer Miller of New Jones of the contract Senator Warmer Miller of New Jones of the contract Senator Warmer Miller of New Jones of the contract Senator Warmer Miller of New Jones of the contract Senator Warmer Miller of New Jones of the contract Senator Warmer Miller of New Jones of the contract Senator Warmer Miller of New Jones of the Contract Senator Warmer Miller of New Jones of the Contract Senator Warmer Miller of New Jones of the Contract Senator Warmer Miller of New Jones of the Miller of N former Senator Warner Miller of New York and Samuel Untermeyer, one of the heavy stockholders in the company, Mr. Newhouse was accompanied by M. M. Johnson. W. C. Thomas preceded them by a day's treed them by a day's travel.

Strike in Harrington-Hickory.

dication of becoming permanent has been made in the Harrington-Hickory ground owned by the Majestic company and situated near Milford. The ore body averages about five feet in thickness and carries about 40 per cent lead and from 10 to 12 ounces of silver to the ton. The ore is a lead carbonate and was found at a depth of 45 feet. An important ore find with every in

Ore and Bullion.

LAYING BROAD **FOUNDATIONS**

Vegas People Expect to Build a Prosperous City.

STEADY GROWTH IS SHOWN

New Townsite Company Leads the

(Special to The Herald.) Las Vegas, Aug. 20.-The past week our little city has been uneventful. The residents are pursuing the even tenor of their way, attending to business, making money and shaping conditions to the point where all will be in readiness for the onward stride that will make the greater and more prospercus Vegas. Look where one will, there is energy and that improvement with a foundation that plainly says here is a place that has a future, is a natural location for a city and is backed by financial forces that will verify every prediction that has been made by the most enthusiastic advocates and promoters of Las Vegas as the commercial and industrial metropolis of the semi-tropic belt, and the great city midway between Salt Lake and Los Angeles.

Foundations are Broad.

The townsite improvements, virtually the railroad interests, are laying a massive foundation in whatever they do, upon which to rear a city and enterprises that will mean a large and prosperous population. Their construction of the company arteries, the grading and curbing of the seven miles of streets, all exhibit the great confidence and surety that these moneyed men have in the future of the Vegas valley, and as a focal point that now presents the magic creation of three months, Las Vegas City in embryo.

Besides the depot and railroad buildings these factors have set the example of solid and neat construction in a local sense by the office building they have erected. This building is an ornament and sets the pace for other builders. The style is in keeping, with southland are literature. It is reconvenient to the complete the style is now the control of the contro southland architecture. It is roomy and neatly decorated and well ventil-ated, and in the burning days of the sun is cool and refreshing; for no matter how hot "Old Sol" makes it in this clime, with the air circulated through building and protected from the burning rays, one is comfortable and free from that sweltering effect so ob-noxious in a humid climate. Whilst the internal decorations are such and existence so pleasant, the outside is receiving a measure of embellishment of "We lead and show you our confidence in the works we do."

Cement Walks.

They are surrounding their buildings with cement walks, and likewise having cement sidewalks for the public with a four-foot space between that and the street curbing for greensward and flower beds. The company is set-ting the pace in good and artistic building. The spirit thus amplified has its effect, and private buildings and business blocks are following, in a com-parative sense, in line. The newer buildings are all partaking of the per-manent and better class of structures, and with the onward march there will be a greater Vegas of solid buildings.

Residence Buildings.

C. C. Chamberlain, the designer of the townsite office building and of the principal buildings of Vegas, has in his office a design of a cottage which is one of twelve that is to be erected here. In style it is a modified bungalow. The exterior walls will be of cement block, rock faced, with spacious porches, hip roops, and inviting appearance. The interior is of the roomy, home-like sort, neatly embellished and fitted up with bath tub, lavatories and those modern fixtures that tends to make home a fixtures that tends to make home a paradise. These buildings will not all be of like construction. Some are con-ceived in the Moorish mission style of In addition to this, the architect is

preparing plans for Judge W. R. Thomas, who will erect the most imposing business block of Vegas, on the corner of Tremont and First streets.

County Seat Agitation.

An agitation is on foot for changing the county seat from Pioche to Vegas. Pioche is out of the way, and a trip to the county seat, a distance of 160 miles from this point, is expensive and takes at least four days to make. It is of great expense to litigants and a burden to taxpayers. This fact is forcing attention and provoking the movement to bring the county seat to the center of population in Lincoln county, which is on a railroad line, and the natural point is Vegas. The citizens, recog-nizing the \$641,000 of indebtedness of the county, are grappling with t proposition in a practical manner accomplish the desired result. In der to avoid the opposition, "We ca

place. He reports a fine quality of timber, spread over an extensive area, sufficient to supply all domestic and mining purposes for many years to come, for all the country around, in-cluding the Bullfrog district and the nany mining camps that are becoming the Mecca for the many wealth-hunt-ers. Thousands of acres have not been located. These, with the timber situ-ated so closely to a ready market, will plain, in the same stretch of timber, is a natural spring of pure crystal water, giving a flow of over 300 miners' inches, the water rippling down the mountain side for about a mile and a half, and. sinking, taking a subterranean course. It is pictured as a beautiful scene. Likewise, much game abounds—deer in plenty. It is the hunter's delight. He found traces of mineral, and declares it a virgin field for the prospector.

Electric Light Plant.

Capital has been interested and a corporation formed to furnish electric power and lighting for this, the gateway to the many fortunes that the undeveloped resources contiguous to Vegas have in store for the venturesome wealth-seeker. The commany organ. the Denver Mining Reporter.

Great possibilities for Canada underlie the inauguration of a cheaper-process for manufacturing pig iron and steel than is now in use. Ontario is dotted with ore bodies, the development of which is a present prevented by lack of cheap fuel. There is coal in the eastern and western parts of Canada, but the cost of conveying it to points where coke is needed for bother hand there are a great many water powers throughout the provinces of Ontario and Quebe, where electricity can be developed and utilized. If the electric system proves to be commercially feus-powers to be commercially feus

water mains, sufficient to supply a city of 35,000 population.

Artesian Water.

Another wonder changer on foot is a movement to organize and develop artesian water. All the evidence goes to show that this element to irrigate the rich productive soil of the desert valley exists in abundance and can be brought from its hidden course to bless and make prosperous the most permanent and substantial factors of a nation's enterprise, the agricultural workers. The soil that this vater is nent and substantial factors of a nation's enterprise, the agricultural workers. The soil that this water is to feed and have it bless mankind has been pronounced in spots as richer and more productive than the annually redisposed soil of the historic Nile. This is on record of government scientists who have made a test of it.

Prosperity Ahead.

With all these natural features of wealth staring the Vegas citizen in the face, he can well feel the movement "along prosperity's path." But if these are such agents to militate for the upbuilding of Vegas, what will it be when the hidden treasures of our mountains the hidden treasures of our mountains will belch forth from those seams and deposits the process. will beich forth from those seams and deposits the precious metals that surely await the courageous seeker, and which in the golden triangle of Nevada have a home in such abundance as to make these surrounding mountains, with the development now progressing, a greater producer than any that have gone before. And to these storehouses of riches the key can be found Las Vegas way. It has well been said Las Vegas "is all right and will be more right."

Men who are faithful coadjutors and competent executors of the aims of the master builders are C. O. Whittemore, A. L. Jones and Frank M. Grace. A. L. Jones and Frank M. Grace. Truly such as these deserve the encomium of "Blessed is he who makes two blades of grass grow where only one grew before."

Vegas Society.

The social side of Vegas is assuming the form of a happy, merry-making people. Twice a week—Wednesday evening at the Pavillon, Friday evening at Beale's resort, "the oasis of the desert"—the young and old, the rich and the poor, congregate for a good time and relief from care and toil. It is a happy scene to behold these merry-makers in gay and festive sport indulge in the tripping of the light fantastic and those other features that so wondrously make all the world akin. Commencing with Mother Nature, as these people do, no happier or joilier crowd can be beheld than in the midst of this great desert plain. Life here, though considered a frontier town, has its compensation and pleasures, so free and satiating as to make lordly comparison with your huddled up and conventional, strained, better society order of the effete cities.

Dr. C. C. Keyes, the well known and The social side of Vegas is assuming

der of the effete cities.

Dr. C. C. Keyes, the well known and representative physician of Vegas, has

representative physician of Vegas, has returned from a trip to the sea shore—flower-laden California.

Judge Edward E. Brennan, a brilliant attorney and the eminent counsel for the Catholic church in the Philippine islands in the settlement of the friar land cases, who has been at Vegas for some time enjoying our pure, health-invigorating ozone, will leave for Salt Lake Sunday, where he contemplates establishing his practice.

BIG HORN BASIN EXCURSION

Round Trip \$30.00. Round Trip \$30.00.

The Colorado Midland railway, in connection with the Rio Grande Western and the Chicago. Burlington & Quincy will sell tickets Sept. 5 to Frannie, Garland and Cody, Wyo., and return, good for thirty days, at the rate of \$30. This will be the only excursion to those points this year and anyone wishing to visit that country should take advantage of this rate. The finest agricultural country in Wyoming is in the Big Horn basin.

Write for book on the Big Horn basin country and all particulars relative to the trip to L. H. Harding, 77 West Second South street. Salt Lake City.

Utah.—Notice is hereby given that at a meeting of the directors held on the 25th day of July. 1905. an assessment of two (2) cents per share was levied on the capital stock of the corporation, payable to J. W. Langley, secretary of said company, at his office in Tonopah. Nevada, as follows: One cent per share on or before the 25th day of August. 1906, and one cent per share on or before the 25th day of August. 1906, and one cent per share on or before the 23d day of September. 1905. Any stock upon which this assessment may remain unpaid on the last mentioned date will de delinquent and advertised for sale at public auction, and unless tayment is made beated so closely to a ready market, will be of great value. By utilizing this natural supply the cost of timber will be reduced by one-half to the mining districts. A company is organized that will install a saw mill and make the circular whirr and turn to the happy tune. "Cheaper Lumber." He also states that 5,000 feet above the desert plain, in the same stretch of timber is plain, in the same stretch of timber is plain, in the same stretch of timber is plain.
